FAMILY INFORMATION

Do you have any children? **Yes**

If yes, please describe in detail (include physical description, personality, medical information....

I just became a father in January 2006, so the amount of information is limited.

He is a healthy boy born after an uncomplicated pregnancy, weighing 3830 grams and was 54 centimeters at birth.

At 10 weeks he had grown to 63½ cm weighing 6200 g – so a big boy following the growth predictions almost on the mark. He has no defects and seems to be developing perfectly and has blond hair and blue eyes precisely as I did.

MEDICAL INFORMATION

Do you have any medical conditions? **No**

PERSONAL MESSAGE FROM THE DONOR

Motivation for donation:

“My wife suffers from PCO - polycystic ovario – which means that she cannot mature her eggs and thus have a normal menstrual period with an egg. Our own troubles have led us to investigate into what opportunities there are for couples with pregnancy difficulties. The tests we had to do showed that I had good quality semen, so we decided that I should what I could to help others in need.

**PS: My wife also thought the world would be a nicer place with more of me in it :-)
– who am I to argue with that!?!?!”**
